Nguyen Quoc Anh

TheQuantScientist | andrewfinance | nguyenquocanh@outlook.com.au | +84 585775676

SUMMARY

Dynamic and passion-driven Economics and Finance Undergraduate student, transitioning to Data Scientist after 2 years in applied Machine Learning R&D. Leading innovative projects on predictive modeling for the digital economy. Proficient in SQL, R, Python, and Generative AI, driving multidisciplinary development. Expertise in identifying financial patterns to inform profitable data-driven decisions. Collaborated with global Ph.D. researchers on time series dynamics for societal applications.

AREAS OF EXPERTISE

Deep Learning - Feature Engineering - Data Mining - Data Processing - Data Analytics - Data Storytelling - Quantitative Analysis - Financial Reporting - Financial Modeling - Investment Research - Portfolio Risk Management - Business Intelligence

PROFESSIONAL EXPERIENCE

AI Systems and LLMs Trainer, *(Outlier AI)* **San Francisco, United States** *04/2024 - present*

- Trained AI bots to be proficient in Vietnamese, fed natural prompts to refine LLMs logic, surpassing ChatGPT-4o linguistic capability.
- Engineered AI prompts, applied copywriting for native Vietnamese dialogues, semantic fine-tuned for the highest response rationality.
- Monitored systems' dialogues for rhetorical error, flagged syntax bugs to Team Lead for review thus re-regulating the language system.
- Adapted to weekly gig tasking changes, ran iterative testing and collected feedback from testers, enhancing chatbot accuracy by 80%.

Collaborative Researcher, *(RMIT Vietnam)* **Ho Chi Minh City, Vietnam** *03/2023 - present*

- Mined, cleaned, preprocessed irregular financial time series data from web APIs and open source, utilised Chaos Theory's fundamentals.
- Developed predictive models (ARIMA, KNN, XGBoost, LSTM, Transformer, etc.) for stock and cryptocurrency real-time forecasting.
- Engineered technical indicators (RSI, SMA, MACD, etc.), applied text mining on ESG reports, improving forecasting errors by 35-50%.
- Designed classification rationale, trained image-based models from HuggingFace libs, labeled time series for computer vision tasks.
- Constructed cryptographic notations and mathematical equations to interpret Blockchain-based cryptosystems alongside AI architectures.
- Read research papers, conducted weekly summary reports, pitched research gaps, led and managed project meetings across timezone.

PROJECTS

Detecting Intraday Crypto Price Movements Using Hierachical Vision Transformers *04/2024 - 07/2024*

- Mined 2-year hourly crypto data from yfinance, transformed raw time series into arbitrary-interval images, developed and fine-tuned pre-trained vision Transformers (e.g. Swin, DeiT, ViT, etc.) for binary classification task, benchmarking against traditional DL models.
- Ensured data/label balance, engineered MA and RSI indicators, ran correlation matrix between OHLCV and engineered datasets, forming parallel heatmaps. Intercorrelation reduced by 53%, Swin achieved a 95% accuracy, 91% AUROC, and 90% AUPRC at testing.

Phu Nhuan Jewelry Company Valuation Report for Q1/2024 Investment (Distinction) *03/2024 - 04/2024*

- Conducted PNJ financial analysis through Eikon and Vietstock, benchmarked CAPM, DDM, and P/E models for investment decisions. Recommended a BUY strategy on P/E value of VND 29.61 billion to optimize ROI despite OVERVALUED signal from target share.
- Scrutinized PNJ's 5-year annual reports and revenue streams, identifying a 56% increase post-2022 and a 21.6% YoY increase in early 2024. Evaluated industry peers and cash flow recovery post-epidemic, foreseeing PNJ's leverage scheme for potential global expansion.

Phase Space Reconstructed Neural ODE for Financial Time Series Forecasting *01/2023 - 03/2024*

- Re-programmed and hyperparameter-tuned image-based NODE for time series regression. Optimized model training with embedding dimensions and time delays for 3D-phase space across 16,000 data points from diverse stock categories (e.g., tech, finance, and pharma).
- Applied TimeSeriesSplit and 5-fold cross validation to prevent data leakage. Improved MAE and RMSE evaluation metrics by over 70%, outperforming hybrid LSTM, Transformer, and SVR across 1000 time steps hence capturing cyclical and long-term dependencies.

EDUCATION

Royal Melbourne Institute of Technology Ho Chi Minh City, Vietnam
Bachelor of Business, *Economics and Finance* *2021-2024*

Relevant Courses: *Corporate Finance, Derivatives and Risk Management, Company & Finance Law, International Finance*

TECHNICAL SKILLS

- **Data Science & AI:** TensorFlow, Keras, PyTorch, Numpy, Scikit-learn, XGBoost, Hugging Face Transformers, Fastai, NLTK
- **Data Analytics:** Power BI, Excel, R, MySQL, Python (Pandas, Matplotlib, Seaborn, Geoplotlib), PostgreSQL, MongoDB
- **Financial Analysis:** Auditing, Financial Reporting, Budget Forecasting, Cost Analysis, Tax Planning, Profit Optimization
- **Digital Tools:** Canva Pro, PowerPoint, LaTeX, Figma, ChatGPT 4, ClaudeAI, Gemini, Slack, Tableau, Google Analytics

VOLUNTEER

Academic Research Peer Reviewer, *(WoS Record)* **Ho Chi Minh City, Vietnam** *01/2024 - present*

- Reviewed 14 papers for multiple Q1-Q2 journals published by IEEE Access.
- Reviewed 4 papers for the International Conference on Pattern Recognition (ICPR 2024).
- Reviewed 3 papers for Computers & Electrical Engineering of Elsevier (Q1 Journal).
- Reviewed 2 papers for Humanities & Social Sciences Communications of Nature (Q1 Journal).

Academic and Communication English Tutor, *Freelance* **Ho Chi Minh City, Vietnam** *02/2021 - 11/2022*

- 1:1 tutored 7 students (2 Onsite and 5 Online), taught basic communication English for DM&C's Korean CEO and a native Japanese.
- Focused on IELTS Academic training (Reading, Writing, and Speaking) thus designing personalized study plans for each participant.
- Consulted more than 200 undergraduate Bachelor students' work, earned 1 Bronze medal in the National English Test for the Gifted.
- Allocated 50% of monthly freelance income to the local impoverished, supporting educational initiatives, and medical aid programs.

HONORS & ACCOLADES

Conference Presenter | *Pacific Asia Conference on Information Systems*	July. 2024
Member of the Association for Information Systems | *AIS*	May. 2024
Finalist | *RMIT Impact*	Jan. 2024
Conference Presenter | *Digital3* and *ICYREB 2024*	Oct. 2023
Project Love Meter Winner | *RMIT Showcase*	Nov. 2023
Certified Python for Machine Learning and SQL for Data Analytics | *NASBA*	Nov. 2023

LANGUAGES

- **Vietnamese** [Native]
- **English** [IELTS 7.0]
